**jennifer thompson and ronald cotton: Identifying the Culprit** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Scientific Approaches to Understanding and Maximizing the Validity and Reliability of Eyewitness Identification in Law Enforcement and the Courts, 2015-01-16 Identifying the Culprit: Assessing Eyewitness Identification makes the case that better data collection and research on eyewitness identification, new law enforcement training protocols, standardized procedures for administering line-ups, and improvements in the handling of eyewitness identification in court can increase the chances that accurate identifications are made. This report explains the science that has emerged during the past 30 years on eyewitness identifications and identifies best practices in eyewitness procedures for the law enforcement community and in the presentation of eyewitness evidence in the courtroom. In order to continue the advancement of eyewitness identification research, the report recommends a focused research agenda.

**jennifer thompson and ronald cotton: Actual Innocence** Jim Dwyer, Peter J. Neufeld, Barry Scheck, 2000 Ten true tales of people falsely accused detail the flaws in the criminal justice system that landed these people in prison

**jennifer thompson and ronald cotton: Convicting the Innocent** Brandon L. Garrett,

2011-08-04 On January 20, 1984, Earl Washington—defended for all of forty minutes by a lawyer who had never tried a death penalty case—was found guilty of rape and murder in the state of Virginia and sentenced to death. After nine years on death row, DNA testing cast doubt on his conviction and saved his life. However, he spent another eight years in prison before more sophisticated DNA technology proved his innocence and convicted the guilty man. DNA exonerations have shattered confidence in the criminal justice system by exposing how often we have convicted the innocent and let the guilty walk free. In this unsettling in-depth analysis, Brandon Garrett examines what went wrong in the cases of the first 250 wrongfully convicted people to be exonerated by DNA testing. Based on trial transcripts, Garrett's investigation into the causes of wrongful convictions reveals larger patterns of incompetence, abuse, and error. Evidence corrupted by suggestive eyewitness procedures, coercive interrogations, unsound and unreliable forensics, shoddy investigative practices, cognitive bias, and poor lawyering illustrates the weaknesses built into our current criminal justice system. Garrett proposes practical reforms that rely more on documented, recorded, and audited evidence, and less on fallible human memory. Very few crimes committed in the United States involve biological evidence that can be tested using DNA. How many unjust convictions are there that we will never discover? Convicting the Innocent makes a powerful case for systemic reforms to improve the accuracy of all criminal cases.

**jennifer thompson and ronald cotton: Getting Life** Michael Morton, 2014-07-08 "A devastating and infuriating book, more astonishing than any legal thriller by John Grisham" (The New York Times) about a young father who spent twenty-five years in prison for a crime he did not commit...and his eventual exoneration and return to life as a free man. On August 13, 1986, just one day after his thirty-second birthday, Michael Morton went to work at his usual time. By the end of the day, his wife Christine had been savagely bludgeoned to death in the couple's bed—and the Williamson County Sheriff's office in Texas wasted no time in pinning her murder on Michael, despite an absolute lack of physical evidence. Michael was swiftly sentenced to life in prison for a crime he had not committed. He mourned his wife from a prison cell. He lost all contact with their son. Life, as he knew it, was over. Drawing on his recollections, court transcripts, and more than 1,000 pages of personal journals he wrote in prison, Michael recounts the hidden police reports about an unidentified van parked near his house that were never pursued; the bandana with the killer's DNA on it, that was never introduced in court; the call from a neighboring county reporting the attempted use of his wife's credit card, which was never followed up on; and ultimately, how he battled his way through the darkness to become a free man once again. "Even for readers who may feel practically jaded about stories of injustice in Texas—even those who followed this case closely in the press—could do themselves a favor by picking up Michael Morton's new memoir...It is extremely well-written [and] insightful" (The Austin Chronicle). *Getting Life* is an extraordinary story of unfathomable tragedy, grave injustice, and the strength and courage it takes to find forgiveness.

**jennifer thompson and ronald cotton: Congressional Record** United States. Congress, 1962 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*

**jennifer thompson and ronald cotton: Rectify** Lara Bazelon, 2018-10-16 A powerful argument for adopting a model of restorative justice as part of the Innocence Movement—so exonerees, crime victims, and their communities can come together to heal In *Rectify*, a former Innocence Project director and journalist Lara Bazelon puts a face to the growing number of men and women exonerated from crimes that kept them behind bars for years—sometimes decades—and that devastate not only the exonerees but also their families, the crime victims who mistakenly identified them as perpetrators, the jurors who convicted them, and the prosecutors who realized too late that they helped convict an innocent person. Bazelon focuses on Thomas Haynesworth, a teenager arrested for multiple rapes in Virginia, and Janet Burke, a rape victim who mistakenly IDed him. It

took over two decades before he was exonerated. Conventional wisdom points to an exoneration as a happy ending to tragic tales of injustice, such as Haynesworth's. However, even when the physical shackles are left behind, invisible ones can be profoundly more difficult to unlock. In the midst of Bazelon's frustration over the blatant limitations of courts and advocates, her hope is renewed by the fledgling but growing movement to apply the centuries-old practice of restorative justice to wrongful conviction cases. Using the stories of Thomas Haynesworth, Janet Burke, and other crime victims and exonerees, she demonstrates how the transformative experience of connecting isolated individuals around mutual trauma and a shared purpose of repairing harm unite unlikely allies. Movingly written and vigorously researched, *Rectify* takes to task the far-reaching failures of our criminal justice system and offers a window into a future where the power it yields can be used in pursuit of healing and unity rather than punishment and blame.

**jennifer thompson and ronald cotton: The Devil in Pew Number Seven** Rebecca Nichols Alonzo, 2010-07-27 2011 Retailers Choice Award winner! Rebecca never felt safe as a child. In 1969, her father, Robert Nichols, moved to Sellerstown, North Carolina, to serve as a pastor. There he found a small community eager to welcome him—with one exception. Glaring at him from pew number seven was a man obsessed with controlling the church. Determined to get rid of anyone who stood in his way, he unleashed a plan of terror that was more devastating and violent than the Nichols family could have ever imagined. Refusing to be driven away by acts of intimidation, Rebecca's father stood his ground until one night when an armed man walked into the family's kitchen . . . And Rebecca's life was shattered. If anyone had a reason to harbor hatred and seek personal revenge, it would be Rebecca. Yet *The Devil in Pew Number Seven* tells a different story. It is the amazing true saga of relentless persecution, one family's faith and courage in the face of it, and a daughter whose parents taught her the power of forgiveness.

**jennifer thompson and ronald cotton: Convicted by Juries, Exonerated by Science** Edward F. Connors, 1996 The development of DNA technology furthers the search for truth by helping police & prosecutors in the fight against violent crime. Most of the individuals whose stories are told in the report were convicted after jury trials & were sentenced to long prison terms. They successfully challenged their convictions, using DNA tests on existing evidence. They had served, on average, seven years in prison. By highlighting the importance & utility of DNA evidence, this report presents challenges to the scientific & justice communities. A task ahead is to maintain the highest standards for the collection & preservation of DNA evidence.

**jennifer thompson and ronald cotton: Warp Speed** Paul Mango, Tom Cotton, 2022-05-18 A powerful story of how our nation's leaders overcame the odds, saving the American people from the throes of a deadly pandemic. The prior record for vaccine development and distribution was approximately 4.5 years. Operation Warp Speed got the COVID-19 vaccine to the American people in less than 10 months. Operation Warp Speed did not happen by accident. It was the result of exceptional leadership, explicit strategy, and unprecedented teamwork. Author Paul Mango, the foremost leader of Operation Warp Speed and the former deputy chief of US Health and Human Services, chronicles the challenges and real dangers of developing the vaccine. From the beginning, two lead scientists, Dr. Moncef Slaoui and Dr. Debra Birx, fought head to head on which vaccines had the greatest probability of success. Tensions grew as the Army Materiel Command and the Center for Disease Control debated on whether public health agencies or the private sector would take over vaccine distribution. Mango details the largest hurdle for the Operation Warp Speed team: though Pfizer, the first distribution company to deliver the mRNA vaccine, sought aid from the Federal Government, they refused the government's request to oversee safe manufacturing of the vaccine, eventually leading to a major scandal as Pfizer missed its contractual obligation to deliver 40 million doses by the end of 2020, the number of positive cases reaching a frightening peak all the while. In this harrowing, behind-the-scenes account of the most successful public-private partnership since World War II, we learn how the nation's biggest leaders accomplished the

impossible. Through sheer will and exceptional commitment, a small group of leaders fulfilled its mission, making the United States the only country in the world which could offer a vaccine to any citizen by April 2021, scarcely 14 months after the genetic identification of the virus.

**jennifer thompson and ronald cotton: *Criminal Justice Masterworks*** Robert Panzarella, Daniel Vona, 2013 *Criminal Justice Masterworks* weaves together three strands of intellectual pursuit: an acquaintance with great writings on criminal justice, the perspective provided by a history of ideas, and the skills of critical thinking. The editors provide a taste of classic works usually known to students only through textbook summaries, short excerpts, or references elsewhere. The masterworks in criminal justice are separated into four areas: criminology, legal studies, police studies, and correctional studies. They include selections from Beccaria on justice and law, torture and the death penalty; Lombroso on biological and social factors in crime; Shaw & McKay on juvenile delinquency; Chambliss on law making and special interest groups; Holmes on the evolution of law; Frankfurter on interpreting statutes; Westley on police solidarity and use of force; Fogelson on the dilemmas of the professional movement in policing; Goldstein on policing in a democratic society; Beaumont & Tocqueville on the reform ideal in penitentiaries; Augustus on probation concepts and strategies; and Clemmer on the effects of imprisonment. The twelve selections are rather extensive in order to convey the main ideas, display the logical and empirical foundations of the works, and allow for critical thinking on the fundamental issues. *Criminal Justice Masterworks* was developed primarily for use in a capstone seminar for college undergraduates majoring in criminal justice studies. It is also useful as a brief survey of great writings in criminal justice for any advanced undergraduate or beginning graduate student or criminal justice professional. It is for students, teachers, and professionals who want to explore criminal justice ideas and practices at a greater depth.

**jennifer thompson and ronald cotton:** *Gringo Nightmare* Eric Volz, 2010-04-27 In the spirit of *Midnight Express* and *Not Without My Daughter* comes the harrowing true story of an American held in a Nicaraguan prison for a murder he didn't commit. Eric Volz was in his late twenties in 2005 when he moved from California to Nicaragua. He and a friend cofounded a bilingual magazine, *El Puente*, and it proved more successful than they ever expected. Then Volz met Doris Jiménez, an incomparable beauty from a small Nicaraguan beach town, and they began a passionate and meaningful relationship. Though the relationship ended amicably less than a year later and Volz moved his business to the capital city of Managua, a close bond between the two endured. Nothing prepared him for the phone call he received on November 21, 2006, when he learned that Doris had been found dead---murdered---in her seaside clothing boutique. He rushed from Managua to be with her friends and family, and before he knew it, he found himself accused of her murder, arrested, and imprisoned. Decried in the press and vilified by his onetime friends, Volz suffered horrific conditions, illness, deadly inmates, an angry lynch mob, sadistic guards, and the merciless treatment of government officials. It was only through his dogged persistence, the tireless support of his friends and family, and the assistance of a former intelligence operative that Eric was released, in December 2007, after more than a year in prison. A story that made national and international headlines, this is the first and only book to tell Eric's absorbing, moving account in his own words. Visit the companion Exhibit Hall at the *Gringo Nightmare* website for additional photos, audio clips, video, case files, and more.

**jennifer thompson and ronald cotton: Introduction to Psychology** Jennifer Walinga, Charles Stangor, This book is designed to help students organize their thinking about psychology at a conceptual level. **jennifer thompson and ronald cotton: Anatomy of Innocence: Testimonies of the Wrongfully Convicted** Laura Caldwell, Leslie S. Klinger, 2017-03-28 Recalling the great muckrakers of the past, an outraged team of America's best-selling writers unite to confront the disasters of wrongful convictions. Wrongful convictions, long regarded as statistical anomalies in an otherwise sound justice system, now appear with frightening regularity. But few people understand just how or why they happen and, more important, the immeasurable consequences that often haunt the lucky few who are acquitted, years after they are proven innocent. Now, in this groundbreaking anthology, fourteen exonerated inmates narrate their stories to a roster of high-profile mystery and thriller writers—including Lee Child, Sara Paretsky, Laurie R. King, Jan Burke and S. J. Rozan—while another exoneree's case is explored in a previously unpublished essay by legendary playwright Arthur Miller. An astonishing and unique collaboration, these testimonies bear witness to the incredible stories of innocent men and women who were convicted of serious crimes and cast into the maw of a vast and deeply flawed American criminal justice system before eventually, and miraculously, being exonerated. Introduced by best-selling authors Scott Turow and Barry Scheck, these master storytellers capture the tragedy of wrongful convictions as never before and challenge readers to confront the limitations and harsh realities of the American criminal justice system. Lee Child tells of Kirk Bloodsworth, who obsessively read about the burgeoning field of DNA testing, cautiously hoping that it held the key to his acquittal—until he eventually became the first person to be exonerated from death row based on DNA evidence. Judge John Sheldon and author Gayle Lynds team up to share Audrey Edmunds's experience raising her children long distance from her prison cell. And exoneree Gloria Killian recounts to S. J. Rozan her journey from that fateful knock on the door and the initial shock of accusation to the scars she carries today. Together, the powerful stories collected within the *Anatomy of Innocence* detail every aspect of the experience of wrongful

conviction, as well as the remarkable depths of endurance sustained by each exoneree who never lost hope.

**jennifer thompson and ronald cotton:** *The Wrong Carlos* James S. Liebman, Shawn Crowley, Andrew Markquart, Lauren Rosenberg, 2014-07-08 In 1989, Texas executed Carlos DeLuna, a poor Hispanic man with childlike intelligence, for the murder of Wanda Lopez, a convenience store clerk. His execution passed unnoticed for years until a team of Columbia Law School faculty and students almost accidentally chose to investigate his case and found that DeLuna almost certainly was innocent. They discovered that no one had cared enough about either the defendant or the victim to make sure the real perpetrator was found. Everything that could go wrong in a criminal case did. This book documents DeLuna's conviction, which was based on a single, nighttime, cross-ethnic eyewitness identification with no corroborating forensic evidence. At his trial, DeLuna's defense, that another man named Carlos had committed the crime, was not taken seriously. The lead prosecutor told the jury that the other Carlos, Carlos Hernandez, was a "phantom" of DeLuna's imagination. In upholding the death penalty on appeal, both the state and federal courts concluded the same thing: Carlos Hernandez did not exist. The evidence the Columbia team uncovered reveals that Hernandez not only existed but was well known to the police and prosecutors. He had a long history of violent crimes similar to the one for which DeLuna was executed. Families of both Carloses mistook photos of each for the other, and Hernandez's violence continued after DeLuna was put to death. This book and its website (thewrongcarlos.net) reproduce law-enforcement, crime lab, lawyer, court, social service, media, and witness records, as well as court transcripts, photographs, radio traffic, and audio and videotaped interviews, documenting one of the most comprehensive investigations into a criminal case in U.S. history. The result is eye-opening yet may not be unusual. Faulty eyewitness testimony, shoddy legal representation, and prosecutorial misfeasance continue to put innocent people at risk of execution. The principal investigators conclude with novel suggestions for improving accuracy among the police, prosecutors, forensic scientists, and judges.

**jennifer thompson and ronald cotton:** *Triangular Road* Paule Marshall, 2010-02 In *Triangular Road*, famed novelist Paule Marshall tells the story of her years as a fledgling young writer in the 1960s. A memoir of self-discovery, it also offers an affectionate tribute to the inimitable Langston Hughes, who entered Marshall's life during a crucial phase and introduced her to the world of European letters during a whirlwind tour of the continent funded by the State Department. In the course of her journeys to Europe, Barbados, and eventually Africa, Marshall comes to comprehend the historical enormity of the African diaspora, an understanding that fortifies her sense of purpose as a writer. In this unflinchingly honest memoir, Paule Marshall offers an indelible portrait of a young black woman coming of age as a novelist in a literary world dominated by white men.

**jennifer thompson and ronald cotton:** *Dead Man Walking* Helen Prejean, 2011-02-02 #1 NATIONAL BESTSELLER • A profoundly moving spiritual journey through our system of capital punishment and an unprecedented look at the human consequences of the death penalty • Stunning moral clarity." —The Washington Post Book World • Basis for the award-winning major motion

picture starring Susan Sarandon and Sean Penn Sister Prejean is an excellent writer, direct and honest and unsentimental. . . . She almost palpably extends a hand to her readers.” —The New York Times Book Review In 1982, Sister Helen Prejean became the spiritual advisor to Patrick Sonnier, the convicted killer of two teenagers who was sentenced to die in the electric chair of Louisiana’s Angola State Prison. In the months before Sonnier’s death, the Roman Catholic nun came to know a man who was as terrified as he had once been terrifying. She also came to know the families of the victims and the men whose job it was to execute—men who often harbored doubts about the rightness of what they were doing. Out of that dreadful intimacy comes a profoundly moving spiritual journey through our system of capital punishment. Here Sister Helen confronts both the plight of the condemned and the rage of the bereaved, the fears of a society shattered by violence and the Christian imperative of love. On its original publication in 1993, *Dead Man Walking* emerged as an unprecedented look at the human consequences of the death penalty. Now, some two decades later, this story—which has inspired a film, a stage play, an opera and a musical album—is more gut-wrenching than ever, stirring deep and life-changing reflection in all who encounter it.

Forest, 1999 Drawing on stories from the lives of the saints, scripture, and everyday life, Jim Forest opens up the mysteries of the Beatitudes. These ancient blessings, with which Christ began his Sermon on the Mount, are all aspects of communion with God. As Forest shows, they are like rungs on a ladder, each one leading to the next. They appear at the doorway of the New Testament to provide an easily memorized summary of everything that follows, right down to the crucifixion (Blessed are you who are persecuted) and the resurrection (Rejoice and be glad).

**jennifer thompson and ronald cotton: *The Wrongful Convictions Reader*** Russell D. Covey, Valena E. Beety, 2022 Fueled by more than 2,000 exonerations of wrongfully convicted men and women, the innocence revolution has shaken the criminal justice system to its core. By gathering the leading research, law, and policy analysis into one volume, *The Wrongful Convictions Reader* explores the core contributing factors to wrongful convictions: false confessions, witness misidentifications, cognitive bias, junk science, police and prosecutorial misconduct, racial bias, and ineffective assistance of counsel. The second edition provides an expanded treatment of certain critical topics. The reader now includes an entire chapter devoted to race and wrongful convictions and provides expanded treatment of the intersections between gender, sexual orientation, and disability and wrongful conviction. The addition of these topics in expanded form creates new options for instructors to explore timely topics in the field of compelling concern to many contemporary students. As before, the book remains more than a mere 'reader' of literature in the field, but rather a book that can serve as the principal text in doctrinal as well as experiential courses. Each chapter is divided into three sections that include: readings, current law overview--which summarizes the key cases in the area; and legal materials, exercises, and media--which provides relevant experiential activities. Examples from the legal materials, exercises,

and media sections includes: Recommended listening and viewing: timed excerpts from podcast episodes, films, and television clips; Oral advocacy exercises: mock bail arguments, parole hearings, testimony before the state legislature, presentations to the state rules committee, appellate oral arguments; Written advocacy exercises: practice motions and comparing state statutes; Issue spotting exercises: transcripts from interrogations and in-court testimony; Review: reflective essays, short answer questions, and true/false questions; Team exercises: plea negotiations; Discussion prompts; and Actual wrongful conviction case documents.

**jennifer thompson and ronald cotton:** *Life-Span Maintenance of Knowledge* Harry P. Bahrick, Lynda K. Hall, Melinda K. Baker, 2013-06-07 This volume describes how well we maintain the knowledge we acquire throughout life. Research traditionally focuses on memory for events that are retained over short time periods that can be accommodated in experiments. This book, by contrast, uniquely describes the evolution of methods suitable for investigating memory of complex knowledge acquired over several years and retained during the entire life-span. The methods substitute statistical for experimental controls, and the investigations involve several hundred participants whose memory is tested up to 50 years after they acquired the knowledge in question. The book covers educational content, such as mathematics and foreign languages; knowledge acquired incidentally, such as the streets and buildings of the cities in which we live; and knowledge acquired through the media. Previously unpublished research on age-related access to knowledge is included. The analyses are based on the accessibility/availability ratio, a metric presented for the first time. This metric allows comparisons of the portion of available knowledge that can be recalled as a function of age, education and other individual differences, and as a function of the domain of knowledge in question. The ratio can be used to evaluate methods of instruction and methods of studying. It can also be used to evaluate memory development and to diagnose memory pathology. The volume will be of interest to researchers in human memory, developmental psychologists, gerontologists in academic and applied settings, and educators.

**jennifer thompson and ronald cotton: False Justice** Jim Petro, Nancy Petro, 2015 Compelling and engagingly written, this book by the former Attorney General of Ohio and his wife takes the reader inside a number of actual cases, summarizes extensive research on the causes and consequences of wrongful conviction, exposing eight common myths that inspire false confidence in the justice system and undermine reform. Now newly published in paperback with an extensive list of web links to wrongful convictions sources throughout the world, False Justice is ideal for use in a wide array of criminal justice and criminology courses. Myth 1: Everyone in prison claims innocence. In fact, guilt is usually clear and undisputed either because the criminal was caught in the act, left substantial evidence, or made the decision to take a plea. While taking a plea does not assure guilt, often a combination of the above reveals the soundness of the defendant's decision to plead rather than go to trial. Lauren McGarity, a mediator, conflict resolution expert, and educator who has worked with hundreds of Ohio inmates for ten years, dispelled this myth for us in False Justice. Myth 2: Our system almost never convicts an innocent person. We mined and share the research and opinion of both conservatives and liberals, and we have concluded that the 311 persons exonerated of serious felonies to date, December 12, 2013, by DNA technology (which was first employed in criminal forensics in the U.S. in the late 1890s) must be the tip of the iceberg, a phrase commonly mentioned in our research. Following the Elkins experience, Nancy and I suspected a substantial number of innocent people in our prisons, but our research required that we frequently revise our thinking upward. Estimates have ranged from, conservatively, about one thousand to as many as tens of thousands of innocent people in American prisons today. We believe -- and research and logic suggest -- that our system convicts innocent persons far more frequently than most imagine and that most Americans, if more fully informed, would consider this a national travesty. Myth 3: Only the guilty confess. Stephen Boorn confessed to a murder in Manchester, Vermont, even though there was no trace of evidence, including a body. Boorn is not alone. False Justice explores what prompted Christopher Ochoa and others falsely accused of murder to incriminate themselves. We explore why the Miranda warning failed in these cases to provide intended protections. Myth 4: Wrongful

conviction is the result of innocent human error. As chief legal officer of Ohio, I supervised a staff of 1,250, including 350 lawyers, who managed more than 35,000 active legal cases at a time. Yet I was totally unaware of the extent of wrongful criminal conviction, and was disappointed to learn that misconduct by police and prosecutors has contributed to many wrong verdicts. In the first edition of *False Justice* we noted that official misconduct was identified early as a contributor in DNA-proven wrongful convictions. Prosecutorial misconduct was a factor in thirty-three of the first seventy-four DNA exonerations (44.6 percent) and police misconduct was present in thirty-seven, or exactly half of those cases.<sup>3</sup> Subsequent exonerations have supported the finding that official misconduct is a significant contributor to wrongful conviction. The National Registry of Exonerations reports at this writing (Dec. 14, 2013) 564 known cases of official misconduct--both police and prosecutor and in some cases both--in its universe of 1,262 exonerations, or in 44.6 percent of known exonerations since 1989.<sup>4</sup> This book challenges thinking on what tactics should and should not be dismissed as human error. Myth 5: An eyewitness is the best testimony. Mistaken eyewitness testimony, a contributor in 75 percent of wrongful convictions, was the prevailing contributor to wrongful conviction in the cases of Elkins, Green, Gillispie, and others included in the book. *False Justice* shares highlights of what we now know about memory and how this has shaped legislative and procedural reforms that will enable more accurate capture of eyewitness testimony. Myth 6: Conviction errors get corrected on appeal. The long, difficult, and expensive struggle to reverse a conviction is demonstrated in the Boorn, Elkins, Green, and Gillispie cases. Our appeals process addresses only certain errors that may have occurred in preparation of the case or in the courtroom. Post-conviction relief is difficult to attain in a system that properly seeks finality in the criminal process. The other route to correcting a conviction error is through new evidence, which, as indicated in Elkins and Gillispie, must meet specific requirements that are very difficult to achieve. Myth 7: It dishonors the victim to question a conviction. *False Justice* reveals that, contrary to a popular opinion, only a minority of convicted persons claim innocence and represent cases that are worthy of post-conviction DNA analysis. Prosecutors who oppose access to post-conviction DNA evidence, which could conclusively prove guilt or innocence, frequently claim that this would dishonor the victim. Public safety requires that we abandon this myth, or understand that by allowing the real perpetrators to escape justice, we contribute to an increase in crime and victims. How does that honor victims? Myth 8: If the justice system has problems, the pros will fix them. While most men and women who work in the criminal justice system are well meaning, committed, and deserving of our respect, they typically do not have the authority, resources, perspective, time, or inclination to change the system. *False Justice* recommends reforms achieved through legislation, policy, and court opinion. However, these will not occur with any urgency until conventional wisdom catches up with the truths revealed in this DNA age. Therefore, it will take us -- everyday American citizens -- not the pros, to accelerate this process. By abandoning myths and advocating reforms, we will not only reduce the destruction that comes with wrongful conviction but will also make the United States safer.

**jennifer thompson and ronald cotton: *The Bling Ring*** Nancy Jo Sales, 2013-05-21 The inspiration for the Sofia Coppola film. The true story of the privileged teenagers who stole millions of dollars worth of valuables from celebrities. With a list of victims that reads like a "Who's Who" of young Hollywood, including Lindsay Lohan, Orlando Bloom, Paris Hilton, and Rachel Bilson, *The Bling Ring* is the stuff of writers' imaginations—with one exception—it's a true story. The media asked: Why would a group of kids who already had designer clothes, money, cars, and status take such risks? Award-winning journalist Nancy Jo Sales found the answer: They did it because they could. And because it was easy. "A great piece of crime reportage," *The Bling Ring* is a shocking look at the seedy world of the real young Hollywood (*The New York Observer*). "For a satire on America's modern day celebrity culture, *The Bling Ring* is hard to beat." —*The Guardian* "Sales [is] a superlative reporter." —*People* "Absolutely terrific." —*The Awl* "Brilliant." —*Grazia Daily*

**jennifer thompson and ronald cotton: The Rise of True Crime** Jean Murley, 2008-08-30  
During the 1950s and 1960s True Detective magazine developed a new way of narrating and understanding murder. It was more sensitive to context, gave more psychologically sophisticated accounts, and was more willing to make conjectures about the unknown thoughts and motivations of killers than others had been before. This turned out to be the start of a revolution, and, after a century of escalating accounts, we have now become a nation of experts, with many ordinary people able to speak intelligently about blood-spatter patterns and organized vs. disorganized serial killers. The Rise of True Crime examines the various genres of true crime using the most popular and well-known examples. And despite its examination of some of the potentially negative effects of the genre, it is written for people who read and enjoy true crime, and wish to learn more about it. With skyrocketing crime rates and the appearance of a frightening trend toward social chaos in the 1970s, books, documentaries, and fiction films in the true crime genre tried to make sense of the Charles Manson crimes and the Gary Gilmore execution events. And in the 1980s and 1990s, true crime taught pop culture consumers about forensics, profiling, and highly technical aspects of criminology. We have thus now become a nation of experts, with many ordinary people able to speak intelligently about blood-spatter patterns and organized vs. disorganized serial killers. Through the suggestion that certain kinds of killers are monstrous or outside the realm of human morality, and through the perpetuation of the stranger-danger idea, the true crime aesthetic has both responded to and fostered our culture's fears. True crime is also the site of a dramatic confrontation with the concept of evil, and one of the few places in American public discourse where moral terms are used without any irony, and notions and definitions of evil are presented without ambiguity. When seen within its historical context, true crime emerges as a vibrant and meaningful strand of popular culture, one that is unfortunately devalued as lurid and meaningless pulp.
