theses on the philosophy of history: On the Concept of History Walter Benjamin, 2016-08-21 On The Concept of History is a politics & social sciences essay written by German philosopher and social science critic Walter Benjamin. On The Concept of History is one of Walter Benjamin's best known, and most controversial works. The politics & social sciences essay is composed of twenty numbered paragraphs in which Benjamin uses poetic and scientific analogies to present a critique of historicism. Walter Benjamin wrote the brief essay shortly before attempting to escape from Vichy France, where French collaborationist government officials were handing over Jewish refugees like Walter Benjamin to the Nazi Gestapo. Walter Benjamin completed On The Concept of History before fleeing to Spain where he unfortunately committed suicide. Benjamin's work is often required textbook reading in various subjects such as humanities, philosophy, and politics & social sciences.

theses on the philosophy of history: *Fire Alarm* Michael Lowy, 2016-10-04 This illuminating study of Benjamin's final essay helps unlock the mystery of this great philosopher Revolutionary critic of the philosophy of progress, nostalgic of the past yet dreaming of the future, romantic partisan of materialism—Walter Benjamin is in every sense of the word an “unclassifiable” philosopher. His essay “On the Concept of History” was written in a state of urgency, as he attempted to escape the Gestapo in 1940, before finally committing suicide. In this scrupulous, clear and fascinating examination of this essay, Michael Löwy argues that it remains one of the most important philosophical and political writings of the twentieth century. Looking in detail at Benjamin's celebrated but often mysterious text, and restoring the philosophical, theological and political context, Löwy highlights the complex relationship between redemption and revolution in Benjamin's philosophy of history.

theses on the philosophy of history: *Illuminations* Walter Benjamin, 1986 Walter Benjamin was one of the most original cultural critics of the twentieth century. *Illuminations* includes his views on Kafka, with whom he felt a close personal affinity; his studies on Baudelaire and Proust; and his essays on Leskov and on Brecht's Epic Theater. Also included are his penetrating study *The Work of Art in the Age of Mechanical Reproduction*, an enlightening discussion of translation as a literary mode, and Benjamin's theses on the philosophy of history. Hannah Arendt selected the essays for this volume and introduces them with a classic essay about Benjamin's life in dark times. Also included is a new preface by Leon Wieseltier that explores Benjamin's continued relevance for our times.

theses on the philosophy of history: *Walter Benjamin and Theology* Colby Dickinson, Stéphane Symons, 2016-05-19 In the *Arcades Project*, Walter Benjamin writes that his work is “related to theology as blotting pad is related to ink. It is saturated with it.” For a thinker so decisive to critical literary, cultural, political, and aesthetic writings over the past half-century, Benjamin's relationship to theological matters has been less observed than it should, even despite a variety of attempts over the last four decades to illuminate the theological elements latent within his eclectic and occasional writings. Such attempts, though undeniably crucial to comprehending his thought, remain in need of deepened systematic analysis. In bringing together some of the most renowned experts from both sides of the Atlantic, *Walter Benjamin and Theology* seeks to establish a new site from which to address both the issue of Benjamin's relationship with theology and all the crucial aspects that Benjamin himself grappled with when addressing the field and operations of theological inquiry.

theses on the philosophy of history: History and Freedom Theodor W. Adorno, 2014-11-05 Despite all of humanity's failures, futile efforts and wrong turnings in the past, Adorno did not let

himself be persuaded that we are doomed to suffer a bleak future for ever. One of the factors that prevented him from identifying a definitive plan for the future course of history was his feelings of solidarity with the victims and losers. As for the future, the course of events was to remain open-ended; instead of finality, he remained committed to a Hölderlin-like openness. This trace of the messianic has what he called the colour of the concrete as opposed to mere abstract possibility. Early in the 1960s Adorno gave four courses of lectures on the road leading to *Negative Dialectics*, his magnum opus of 1966. The second of these was concerned with the topics of history and freedom. In terms of content, these lectures represented an early version of the chapters in *Negative Dialectics* devoted to Kant and Hegel. In formal terms, these were improvised lectures that permit us to glimpse a philosophical work in progress. The text published here gives us an overview of all the themes and motifs of Adorno's philosophy of history: the key notion of the domination of nature, his criticism of the existentialist concept of a historicity without history and, finally, his opposition to the traditional idea of truth as something permanent, unchanging and ahistorical.

theses on the philosophy of history: Words of Light Eduardo Cadava, 2018-06-05 Here Eduardo Cadava demonstrates that Walter Benjamin articulates his conception of history through the language of photography. Focusing on Benjamin's discussions of the flashes and images of history, he argues that the questions raised by this link between photography and history touch on issues that belong to the entire trajectory of his writings: the historical and political consequences of technology, the relation between reproduction and mimesis, images and history, remembering and forgetting, allegory and mourning, and visual and linguistic representation. The book establishes the photographic constellation of motifs and themes around which Benjamin organizes his texts and thereby becomes a lens through which we can begin to view his analysis of the convergence between the new technological media and a revolutionary concept of historical action and understanding. Written in the form of theses--what Cadava calls snapshots in prose--the book memorializes Benjamin's own thetic method of writing. It enacts a mode of conceiving history that is neither linear nor successive, but rather discontinuous--constructed from what Benjamin calls dialectical images. In this way, it not only suggests the essential rapport between the fragmentary form of Benjamin's writing and his effort to write a history of modernity but it also skillfully clarifies the relation between Benjamin and his contemporaries, the relation between fascism and aesthetic ideology. It gives us the most complete picture to date of Benjamin's reflections on history.

theses on the philosophy of history: Walter Benjamin and History Andrew Benjamin, 2005-12-01 The first book to examine in detail Benjamin's *Theses on the Philosophy of History* Benjamin's collection of fragments, *Theses on the Philosophy of History*, play a determining role in how Benjamin's thought is understood, as well as in the debate about the interplay between politics, history and time. *Walter Benjamin and History* is the first volume to give access to the themes and problems raised by the *Theses*, providing valuable exegetical and historical work on the text. The essays collected here are all the work of noted Benjamin scholars, and pursue the themes central to the *Theses*.

theses on the philosophy of history: Gadamer and the Transmission of History Jerome Veith, 2015-02-02 Observing that humans often deal with the past in problematic ways, Jerome Veith looks to philosopher Hans-Georg Gadamer and his hermeneutics to clarify these conceptions of history and to present ways to come to terms with them. Veith fully engages Truth and Method as well as Gadamer's entire work and relationships with other German philosophers, especially Kant, Hegel, and Heidegger in this endeavor. Veith considers questions about language, ethics, cosmopolitanism, patriotism, self-identity, and the status of the humanities in the academy in this very readable application of Gadamer's philosophical practice.

theses on the philosophy of history: *Multicultural Dynamics and the Ends of History* Real Fillion, 2008-02-28 *Multicultural Dynamics and the Ends of History* provides a strikingly original

reading of key texts in the philosophy of history by Kant, Hegel, and Marx, as well as strong arguments for why these texts are still relevant to understanding history today. Réal Fillion offers a critical exposition of the theses of these three authors on the dynamics and the ends of history, in order to provide an answer to the question: Where are we headed? Grounding his answer in the twin observations that the world is becoming increasingly multicultural and increasingly unified, Fillion reasserts the task of the speculative philosophy of history as it had been understood by German philosophy: the articulation and understanding the historical process as a developmental whole. Fillion's interpretation engages many recent strands of social and political thought in order to provide a new understanding of current events, and possible futures, grounded in the understanding of the dynamics of the past and the present provided by Kant, Hegel, and Marx. The result is a rich and timely answer to the question of where our world is headed today.

theses on the philosophy of history: Karl Marx's Theory of History Gerald A. Cohen, 2020-05-05 First published in 1978, this book rapidly established itself as a classic of modern Marxism. Cohen's masterful application of advanced philosophical techniques in an uncompromising defense of historical materialism commanded widespread admiration. In the ensuing twenty years, the book has served as a flagship of a powerful intellectual movement--analytical Marxism. In this expanded edition, Cohen offers his own account of the history, and the further promise, of analytical Marxism. He also expresses reservations about traditional historical materialism, in the light of which he reconstructs the theory, and he studies the implications for historical materialism of the demise of the Soviet Union.

theses on the philosophy of history: A Companion to the Philosophy of History and Historiography Aviezer Tucker, 2011-06-28 A COMPANION TO THE PHILOSOPHY OF HISTORY AND HISTORIOGRAPHY The philosophy of historiography examines our representations and knowledge of the past, the relation between evidence, inference, explanation and narrative. Do we possess knowledge of the past? Do we just have probable beliefs about the past, or is historiography a piece of convincing fiction? The philosophy of history is the direct philosophical examination of history, whether it is necessary or contingent, whether it has a direction or whether it is coincidental, and if it has a direction, what it is, and how and why it is unfolding? The fifty entries in this Companion cover the main issues in the philosophies of historiography and history, including natural history and the practices of historians. Written by an international and multi-disciplinary group of experts, these clearly written entries present a cutting-edge updated picture of current research in the philosophies of historiography and history. This Companion will be of interest to philosophers, historians, natural historians, and social scientists.

theses on the philosophy of history: Radio Benjamin Walter Benjamin, 2021-12-07 Walter Benjamin was fascinated by the impact of new technology on culture, an interest that extended beyond his renowned critical essays. From 1927 to '33, he wrote and presented something in the region of eighty broadcasts using the new medium of radio. Radio Benjamin gathers the surviving transcripts, which appear here for the first time in English. This eclectic collection demonstrates the range of Benjamin's thinking and his enthusiasm for popular sensibilities. His celebrated "Enlightenment for Children" youth programs, his plays, readings, book reviews, and fiction reveal Benjamin in a creative, rather than critical, mode. They flesh out ideas elucidated in his essays, some of which are also represented here, where they cover topics as varied as getting a raise and the history of natural disasters, subjects chosen for broad appeal and examined with passion and acuity. Delightful and incisive, this is Walter Benjamin channeling his sophisticated thinking to a wide audience, allowing us to benefit from a new voice for one of the twentieth century's most respected thinkers.

theses on the philosophy of history: The Practice of Conceptual History Reinhart Koselleck, Todd Samuel Presner, 2002 Reinhart Koselleck is one of the most important theorists of history and historiography of the last half century. theses on the philosophy of history: Philosophy for Non-Philosophers Louis Althusser, 2017-02-23 In 1980, at the end of the most intensely political period of his work and life, Louis Althusser penned Philosophy for Non-philosophers. Available here for the first time in English, Philosophy for Non-philosophers constitutes a rigorous and engaged attempt to address a wide reading public unfamiliar with Althusser's project. As such, the work is a concentration of the most fundamental theses of Althusser's own ideas, and presents a synthesis of his sprawling and disparate philosophical and political writings. Nowhere else does Althusser push the distinction between philosophy and other disciplines as far, or develop in such detail the concept of 'practice'. Rather than a work of 'popular philosophy', Philosophy for Non-philosophers is a continuation and conglomeration of Althusser's thought; a thought whose radicality is still perceptible in those that have followed since. Philosophy for Non-philosophers thus provides a vivid encapsulation of Althusser's seminal influence on the leading thinkers of today, including Ranciere, Badiou, Balibar, and Žižek.

theses on the philosophy of history: The Dream of a Democratic Culture T. Lacy, 2013-11-26 This book presents a moderately revisionist history of the great books idea anchored in the following movements and struggles: fighting anti-intellectualism, advocating for the liberal arts, distributing cultural capital, and promoting a public philosophy, anchored in mid-century liberalism, that fostered a shared civic culture.

theses on the philosophy of history: Society Of The Spectacle Guy Debord, 2012-10-01 The Das Kapital of the 20th century, Society of the Spectacle is an essential text, and the main theoretical work of the Situationists. Few works of political and cultural theory have been as enduringly

provocative. From its publication amid the social upheavals of the 1960's, in particular the May 1968 uprisings in France, up to the present day, with global capitalism seemingly staggering around in it's Zombie end-phase, the volatile theses of this book have decisively transformed debates on the shape of modernity, capitalism, and everyday life in the late 20th century. This 'Red and Black' translation from 1977 is Introduced by Notting Hill armchair insurrectionary Tom Vague with a galloping time line and pop-situ verve, and given a more analytical over view by young upstart thinker Sam Cooper.

theses on the philosophy of history: End of History and the Last Man Francis Fukuyama, 2006-03-01 Ever since its first publication in 1992, the New York Times bestselling *The End of History and the Last Man* has provoked controversy and debate. Profoundly realistic and important...supremely timely and cogent...the first book to fully fathom the depth and range of the changes now sweeping through the world. —The Washington Post Book World Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

theses on the philosophy of history: Justifying Historical Descriptions C. Behan McCullagh, 1984-10-25 In common with history, all the social sciences crucially rely on descriptions of the past for their evidence. But when, if ever, is it reasonable to regard such descriptions as true? This book attempts to establish the conditions that warrant belief in historical descriptions. It does so in a non-technical way, analysing numerous illustrations of the different kinds of argument about the past employed by historians and others. The author concludes that no historical description can be finally proved, and that we are only ever justified in believing them for certain practical purposes. This central question has not been addressed in such a thorough and systematic manner before. It draws on recent philosophy of history and will interest philosophers. But the wealth of material and accessibility of the presentation will also make it very valuable for historians and other social scientists concerned with the logic of their disciplines.

theses on the philosophy of history: Walter Benjamin's Other History Beatrice Hanssen, 2000-12-04 In this study, Beatrice Hanssen unlocks the philosophical and ethical dimensions of the Trauerspiel study, showing how its thematics persisted well into the later writings of the thirties. For by introducing the materialistic category of natural history in *The Origin of German Tragic Drama*, Benjamin not only criticized idealistic conceptions of history writing but also expressed an ethico-theological call for another kind of history, one no longer anthropocentric in nature. This profound critique of historical thinking, Hanssen shows, went hand in hand with a radical de-limitation of the human subject, informed by his interest in questions about ethics, the law, and justice. Through an analysis of the seemingly innocuous figures of stones, animals, and angels that are scattered throughout his writings, Hanssen reconstructs the often neglected ethical dimension of his historical thought. In the course of doing so, she not only places Benjamin's work in the context of contemporaries such as Adorno, Cohen, Lukacs, Kafka, Kraus, and Heidegger but also demonstrates the persistence of Benjaminian themes in contemporary philosophy and critical theory.

theses on the philosophy of history: Worldviews Richard DeWitt, 2018-04-16 Winner of the 2018 Choice Award for Outstanding Academic Title! PRAISE FOR PREVIOUS EDITIONS This is a brilliantly clear introduction (and indeed reframing) of the history and philosophy of science in terms of worldviews and their elements.... In addition, the book is incredibly well-informed from both a scientific and philosophical angle. Highly recommended. Scientific and Medical Network Unlike many other introductions to philosophy of science, DeWitt's book is at once historically informative and philosophically thorough and rigorous. Chapter notes, suggested readings, and references enhance its value. Choice Written in clear and comprehensible prose and supplemented by effective diagrams and examples, *Worldviews* is an ideal text for anyone new to the history and philosophy of science. As the reader will come to find out, DeWitt is a gifted writer with the unique ability to break down complex and technical concepts into digestible parts, making *Worldviews* a welcoming and not overwhelming book for the introductory reader. *History and Philosophy of the Life Sciences*, vol. 28(2) Now in its third edition, *Worldviews: An Introduction to the History and Philosophy of Science*

strengthens its reputation as the most accessible and teachable introduction to the history and philosophy of science on the market. Geared toward engaging undergraduates and those approaching the history and philosophy of science for the first time, this intellectually-provocative volume takes advantage of its author's extensive teaching experience, parsing complex ideas using straightforward and sensible examples drawn from the physical sciences. Building on the foundations which earned the book its critical acclaim, author Richard DeWitt considers fundamental issues in the philosophy of science through the historical worldviews that influenced them, charting the evolution of Western science through the rise and fall of dominant systems of thought. Chapters have been updated to include discussion of recent findings in quantum theory, general relativity, and evolutionary theory, and two new chapters exclusive to the third edition enrich its engagement with radical developments in contemporary science. At a time in modern history when the nature of truth, fact, and reality seem increasingly controversial, the third edition of *Worldviews* presents complex concepts with clarity and verve, and prepares inquisitive minds to engage critically with some of the most exciting questions in the philosophy of science.

theses on the philosophy of history: Hegel's Grand Synthesis Daniel Berthold-Bond, 1989-07-03 This book offers the first genuinely systematic treatment of Hegel's eschatology in the literature. It is an investigation into Hegel's project to demonstrate the ultimate unity of thought and being (consciousness and reality, self and world). The author traces the project through Hegel's epistemology, metaphysics, and philosophy of history. The grand synthesis creates a basic tension, an ambivalence, that reaches its most acute formulation in Hegel's eschatological language of a final completion or fulfillment of history. This conflicts with his dialectic and Heraclitean metaphysics of becoming. Berthold-Bond concludes that a substantially new approach to Hegel's eschatology is needed.

theses on the philosophy of history: 99 Theses on the Revaluation of Value Brian Massumi, 2018-09-11 A speculative exploration of value, emphasizing practical experimentation in its future forms How can we begin to envision a postcapitalist economy without first engineering a radically new concept of value? And with a renewed sense of how and what we collectively value, what would the transition to new social forms look like? According to Brian Massumi, it is time to reclaim value from the capitalist market and the neoliberal reduction of life to "human capital." It is time to occupy surplus-value for a postcapitalist future. 99 Theses on the Revaluation of Value is both a theoretical and practical manifesto. Massumi reexamines ideas about money, exchange, and finance, with special attention to how what we value in experience for quality is economically translated into quantity. He proposes new conceptual tools for understanding value in directly qualitative terms, speculating on how this revaluation of value might practically form the basis of an alter-economy. A

promising path, he suggests, might involve emerging blockchain technologies beyond bitcoin. But these must be uprooted from their libertarian origins and redesigned to serve not individual choice but collective creativity, not calculations of self-interest but collaborative speculations on the future to be shared. It is necessary to grasp the specificity of our contemporary neoliberal condition and the ultimately destructive forms of power it mobilizes to better resist their claim on the future. 99 Theses on the Revaluation of Value is written to galvanize a radical redefinition of value for a livable postcapitalist future.

theses on the philosophy of history: The Angel of History Stéphane Mosès, 2009 In The Angel of History, Moses looks at three philosophers Franz Rosenzweig, Walter Benjamin, and Gershom Scholem who formulated a new vision of history informed by Jewish messianism in 1920s Germany.

theses on the philosophy of history: Hegel's Undiscovered Thesis-Antithesis-Synthesis Dialectics Leonard F. Wheat, 2012-12-25 For over fifty years, Hegel interpreters have rejected the former belief that Hegel used thesis-antithesis-synthesis dialectics. In this incisive analysis of Hegel's philosophy, Leonard F. Wheat shows that the modern interpretation is false. Wheat rigorously demonstrates that there are in fact thirty-eight well-concealed dialectics in Hegel's two most important works--twenty-eight in Phenomenology of Spirit and ten in The Philosophy of History. Wheat also develops other major new insights: • Hegel's chief dialectical format consists of a two-concept thesis, a two-concept antithesis, and a two-concept synthesis that borrows one concept from the thesis and one from the antithesis. • All dialectics are analogically based on the Christian separation-and-return myth: the dialectic separates from and returns to a thesis concept. • Hegel's enigmatic Spirit is a four-faceted, deliberately fictitious, nonsupernatural entity that exists only as an atheistic redefinition of God. • Spirit's divine life begins not with consciousness but with unconsciousness, in the prehuman state of nature-before Spirit acquires its human mind. • Hegel's concept of freedom is not a sociopolitical concept but release from bondage to religious superstition (belief in a supernatural God). • In Hegel's widely misinterpreted master-and-slave parable, the master is God, the slave is man, and the slave's gaining his freedom is man's becoming an atheist. • The standard non-Hegelian base-superstructure interpretation of Marx's dialectics is false. Marx's basic dialectic is actually this: thesis = communal ownership poverty, antithesis = private ownership wealth, synthesis = communal ownership wealth. Wheat also shows that Marx and Tillich, who subtly used Hegelian dialectics in their own works, are the only authors who have understood Hegelian dialectics. Thoroughly researched and exhaustive in detail, this radical reinterpretation of Hegel's philosophy should greatly interest Hegel scholars and students.

theses on the philosophy of history: Interpretation of Nietzsche's Second Untimely Meditation Martin Heidegger, 2016-09-12 A "readable and fluent" translation of a work that demonstrates a crucial shift in Heidegger's approach to Nietzsche in the late 1930s (Phenomenological Reviews). In Nietzsche's Second Untimely Meditation, Martin Heidegger offers a radically different reading of a text that he had read decades earlier. This evolution in his relationship with Nietzsche has a significant impact on his understandings of the differences between animals and humans, temporality and history, and the Western philosophical tradition developed. With his new reading, Heidegger delineates three Nietzschean modes of history, which should be understood as grounded in the structure of temporality or historicity. He also offers a metaphysical determination of life and the essence of humankind. Despite the fragmentary and disjointed quality of the original lecture notes that comprise this text, Ullrich Hasse and Mark Sinclair deliver a clear and accessible translation.

theses on the philosophy of history: Habermas and the Unfinished Project of Modernity

Maurizio Passerin d'Entrèves, Seyla Benhabib, 1997 This collection of ten essays offers the first systematic assessment of Jürgen Habermas's *Philosophical Discourse of Modernity*, a book that defended the rational potential of the modern age against the depiction of modernity as a spent epoch. The essays (of which four are newly commissioned, five were published in the journal *Praxis International*, and one -- by Habermas -- first appeared in translation in *New Critique*) are divided into two sections: *Critical Rejoinders* and *Thematic Reformulations*. An opening essay by d'Entrèves sets out the main issues and orients the debate between Habermas and the postmodernists by identifying two different senses of responsibility: a responsibility to act versus a responsibility to otherness (an openness to difference, dissonance, and ambiguity). These are linked with two alternative understandings of the primary function of language: action-orienting versus world-disclosing. This is a fruitful way of looking at the issues that Habermas has raised in his attempt to resurrect and complete the project of Enlightenment. Habermas's essay discusses the main themes of his book in the context of a critical engagement with neoconservative cultural and political trends. The main body of essays offer an interesting collection of points of view, for and against Habermas's position by philosophers, social scientists, intellectual historians, and literary critics.
